PROFILE

Results-driven and creative developer with hands-on experience in building responsive web and mobile applications using React and React Native. Passionate about crafting clean, efficient code and delivering seamless user experiences across platforms. Skilled in front-end development, UI/UX implementation, and integrating APIs to bring dynamic features to life. Eager to contribute to innovative projects in a collaborative team environment and continue growing as a full-stack or cross-platform developer.

PROJECTS

YumMap – Food Discovery Mobile App

- A feature-rich cross-platform mobile app developed using React Native, designed to help users discover nearby restaurants through a location-based interface. YumMap delivers a smooth and engaging user experience with modern features and real-time data integration.

- Key Features:

- Interactive map to explore nearby food spots based on user location
- Filter options for cuisine type, distance, and ratings
- Restaurant detail pages with menus, reviews, and images
- Google Login/Signup for quick and secure user authentication
- Push Notifications powered by Firebase for offers and updates
- Favorite restaurants feature to bookmark and revisit spots
- Seamless integration with Google Maps for directions
- Tech Stack: React Native, Firebase (Authentication,Firestore, Notifications), Google Maps API, Redux

The Daily Fit – E-commerce Website

- A clean and fully responsive e-commerce website developed using Next.js, offering users a smooth and engaging shopping experience. showcases product listings, cart functionality, and user-friendly navigation—ideal for small-scale online stores or portfolio demonstration.

- Key Features:

- Product listing with images, prices, and details
- Add to cart and remove from cart functionality
- Quantity adjustment within the cart
- User authentication with Firebase Google Login/Signup
- Order saving and retrieval through Firebase Firestore
- Responsive layout with a modern and intuitive UI
- Tech Stack: React.js, Firebase (Authentication, Firestore), CSS, Vercel
